

## Technical informations for digitalprint

***We do not accept PDF files or securised files but original files from the following software:***

### **A. MAC format**

#### **1. Used softwares :**

- |                       |                          |
|-----------------------|--------------------------|
| • Making-up:          | Indesign CC and older    |
| • Vectorized drawing: | Illustrator CC and older |
| • Photo touching up:  | Photoshop CC and older   |

#### **2. Used drives :**

- CD-ROM
- DVD

### **B. PC format**

#### **1. Used softwares :**

- |                       |                          |
|-----------------------|--------------------------|
| • Making-up:          | Indesign CC and older    |
| • Vectorized drawing: | Illustrator CC and older |
| • Photo touching up:  | Photoshop CC and older   |

#### **2. Used drives :**

- CD-ROM
- DVD

### **Extra specifications to realize your files :**

Here are some hints to realize your files and to enable us a good reproduction :

Create your documents in the above mentioned softwares at a 1/10 scale.

If your logo does not contain any imported image, then please send vectorized files (Illustrator, Freehand,...). This will invoid the imperfection of the drawing and of the text wich is not visible at low scale.

If we have to match specific colours, please mention the PMS colour references.

Add a bleed (5 cm at scale 1/10) for the sewing.

Always join to your order a colour print (or JPEG / PDF) for control.

The pictures must be scanned in CMYK in the traditional tiff and eps formats with a resolution of 600 dpi (scale 1/10).

Note : a higher resolution is not necessary and can slow down the transfer of the files and the treatment of the prints.

Leave enough spaces between the drawings, the pictures, the texts and the edges of the flags to avoid the stitching of the hem (or sleeve) to go in these.

We do not use secured PDF or TIFF-IT files.

### **Technical specifications :**

#### **A. PVC :**

Maximum printed width : 495 cm

Print in CMYK

The available widths depend on the support

#### **B. Cloth :**

Maximum printed width : 310 cm

Print in CMYK

The available widths depend on the support
